

**In the Claims:**

19. (Amended) A method of forming a device comprising:  
  
providing a recess within a substrate;  
  
providing at least a portion of an RF antenna within the recess;  
  
providing an integrated circuit at least partially within the recess and in  
operative electrical connection with the antenna; and  
  
wherein the antenna crosses itself at a bypass, said bypass comprising  
dielectric material between crossing portions of the antenna.

Cancel claims 20-38 and 44-53.
